

THE SECRET FEAST

Welcome, Future Agent! This is your first mission from Agents of Nature. It starts now.

YOU NEED

Today's food scraps & peels · a plate or tray · a camera · 10 minutes

MEET RIA THE BACTERIA

Right under your feet, Ria the Bacteria runs the busiest kitchen on Earth. Ria's crew of tiny chefs cooks fallen leaves, petals and peels into food for the trees. But the kitchen is running low – the ingredients that should reach it keep vanishing into the dustbin instead.

Your mission, Agent – rescue the ingredients and serve the chefs a secret feast.

CLUE

Everything in nature follows the Law of Return. Trees return their leaves and flowers. Birds return feathers and eggshells. Even snails return their shells. It all goes back to the soil.

So here's the question, Agent – what can a human return?

YOUR MISSION

1

RESCUE

Before the dustbin swallows them, collect today's peels and food scraps. Step outside or to your balcony for a few fallen leaves or flowers – the chefs need these too.

2

SERVE

Arrange it all on a plate like a chef's special. This is not waste – it's a feast for Ria and our tiny friends below.

3

PHOTOGRAPH

Take a picture of your feast. That's your Mission Report – and your answer: humans can return too. This is us, following the Law of Return.

AFTER THE PHOTO

Lay the leaves and flowers back on the soil – the chefs will find them. The peels go back to your grown-up for now. Delivering a whole feast to the underground kitchen? That's certified-Agent training – waiting inside the book.

FILE YOUR MISSION REPORT

Send your photo at agentsofnature.club/join – your first mission gets your Agent ID stamped with the official seal: Field Status CONNECTED. No Agent ID yet? Get one free – it takes a minute.

MISSION COMPLETE!

Somewhere below, the chefs are cheering. You saw waste – and recognised a feast. That's exactly how an Agent of Nature sees the world.
